

Create Node RED Service:

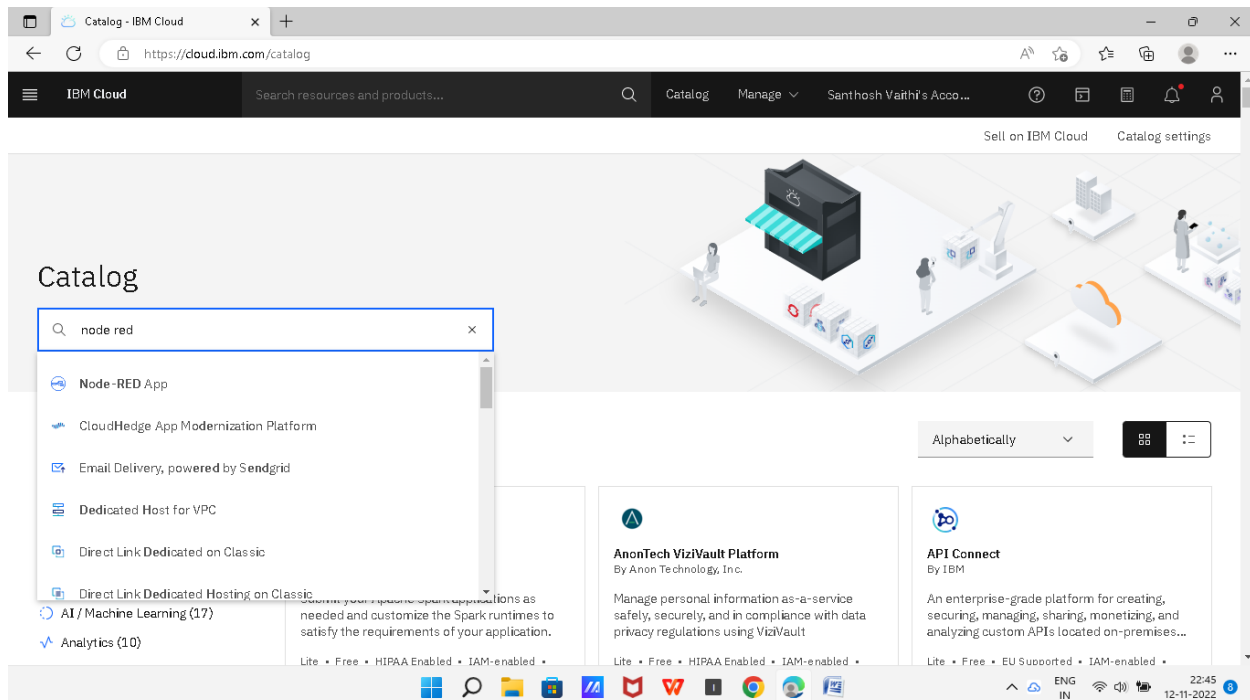

TEAM ID : PNT2022TMID29465

The screenshot shows the IBM Cloud Dashboard. The top navigation bar includes the IBM Cloud logo, a search bar, and links for Catalog, Manage, and the user's account (Santhosh Vaithi's Account). The main content area is titled "Dashboard" and features a "For you" section with several recommended actions:

- Build**: Explore IBM Cloud with this selection of easy starter tutorials and services.
- Create and deploy an application**: Browse our starter kits, and then select one to jump start the process to create and deploy your app. (Getting started: 5 min)
- Build a web app with Watson Speech to Text**: Deploy a conversational interface compatible with any application, device, or channel. (Getting started: 15 min)
- Build a Virtual Private Cloud (VPC)**: Upgrade to a paid account to create your own protected space in the IBM Cloud. (Getting started: 7 min)
- Get Started with Watson Studio**: Get started with using AI and Cloud Object Storage in 15 minutes. (Popular: 2 hr)
- IBM Watson Things**: Connect your devices to the cloud and get started with IBM Watson Things. (Recommended)

Below the "For you" section, there are three more cards: "User access" (Manage users), "News" (View all), and "Planned maintenance" (View all). The bottom of the dashboard shows a Windows taskbar with various application icons and a system tray with the date and time (22:45, 12-11-2022).

The screenshot shows the IBM Cloud Catalog. The top navigation bar is similar to the dashboard, but the main content area is titled "Catalog". A search bar at the top left contains the text "node red". Below the search bar, a list of search results is displayed:

- Node-RED App
- CloudHedge App Modernization Platform
- Email Delivery, powered by Sendgrid
- Dedicated Host for VPC
- Direct Link Dedicated on Classic
- Direct Link Dedicated Hosting on Classic
- AI / Machine Learning (17)
- Analytics (10)

On the right side of the catalog, there are two featured service cards:

- AnonTech ViziVault Platform** by Anon Technology, Inc. (Manage personal information as-a-service safely, securely, and in compliance with data privacy regulations using ViziVault)
- API Connect** by IBM (An enterprise-grade platform for creating, securing, managing, sharing, monetizing, and analyzing custom APIs located on-premises...)

The bottom of the catalog shows a Windows taskbar with various application icons and a system tray with the date and time (22:45, 12-11-2022).

Overview

This starter kit provides a pre-configured Node-RED application, including a Cloudant service to store the application flow configuration. Add services, generate and download the code, use the IBM Cloud Developer Tools CLI to run and debug locally, then deploy to Cloud Foundry or a DevOps Pipeline.

This starter kit will help you

- Generate an application with Node-RED
- Generate an application with files for deploying to Cloud Foundry or a DevOps Pipeline
- Connect to provisioned services

What's included?

Cloudant

Free to start

Deployment Automation

Select your deployment target and configure your DevOps toolchain. After you click **Create**, the toolchain is created, and the deployment process is started automatically.

Deployment target

Kubernetes Service

IBM

Deploy, scale, and manage your containerized application workloads to highly available clusters.

Red Hat OpenShift

IBM

Deploy your apps on highly available clusters that come installed with Red Hat OpenShift on IBM Cloud.

Cloud Foundry

IBM

Deploy and run your applications without managing servers or clusters. A Life plan is available for quick and easy deployment.

Getting started with apps

Step 1. Select the deployment target

Select your deployment target, and then provide the configuration information.

IBM Cloud Kubernetes Service

Kubernetes is an open source platform for managing containerized workloads and services across multiple hosts, and offers management tools for deploying, automating, monitoring, and scaling containerized apps with minimal to no manual intervention. [Learn more.](#)

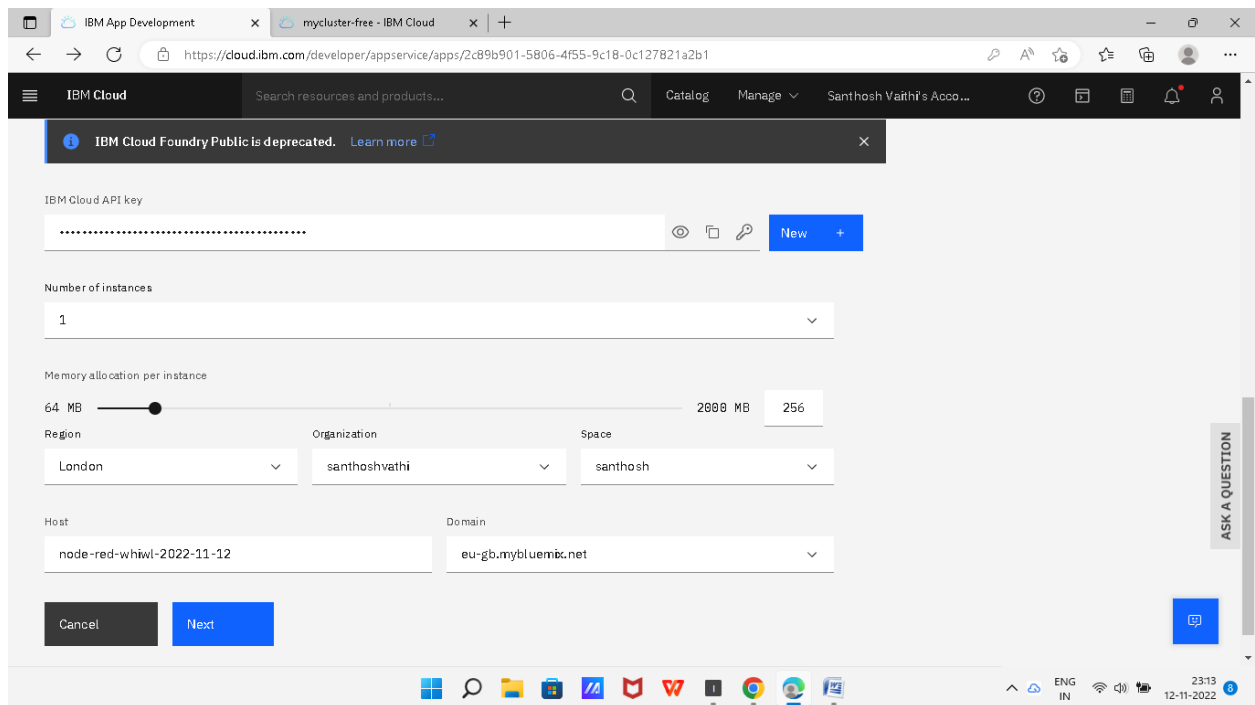

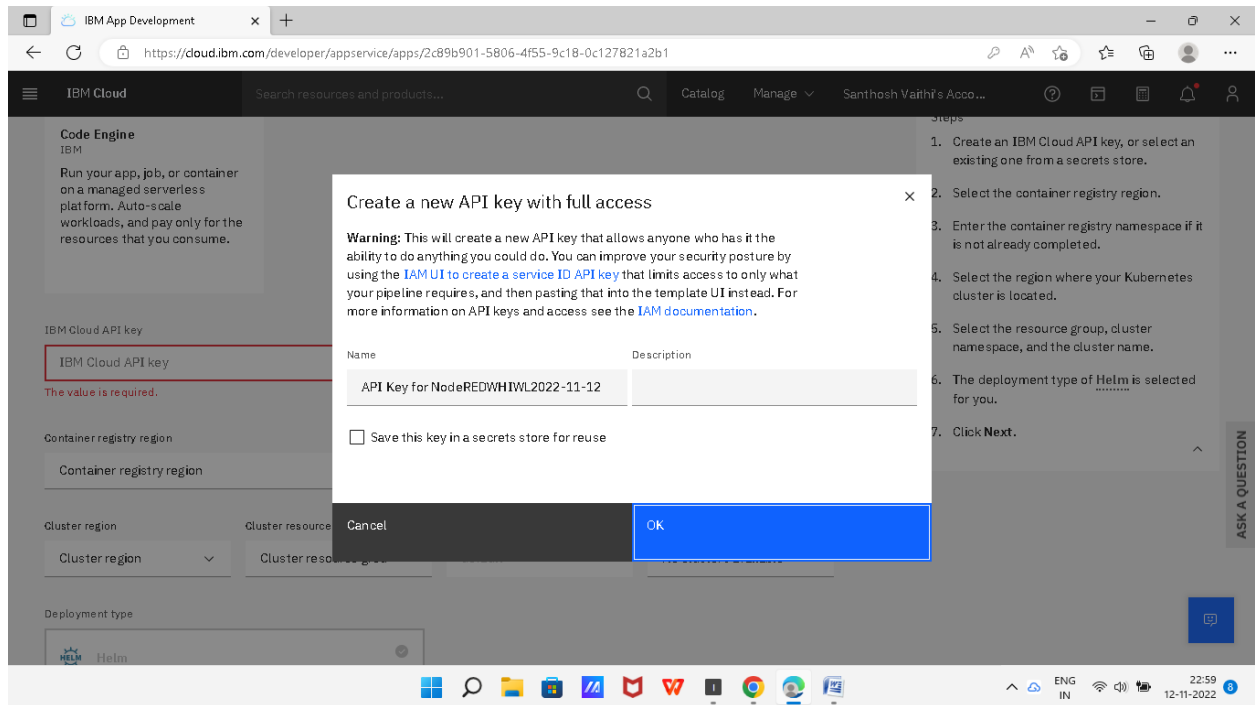

Before you begin

- One free Kubernetes cluster is available per account.
- If you don't have an available cluster, you must create one before continuing. Allow 10-20 minutes for the cluster to be provisioned. [Create cluster.](#)
